

All dimensions are O.D. (Outside Dimension)

**Strips:** Basic units, such as A3, B2, and D are shown below combined into strips in our five most common total widths. Strips can be stacked and unstacked at your facility for maximum flexibility. They can also be multi-tiered. (i.e., 2A1/2A1)

**Banks:** A bank is built with rails and has a laminated exterior bottom. Rails are a 3/4" additional thickness across the front and back bottom of the cages. Any cage that sits on the floor or has casters must have rails. Multi-tiered configurations over 54" tall by 58" wide are built as 2-tiered banks with stackable strips.

**Cage prices include cage with mounted gate. Cages are 28" deep including gate.**
